Morning Highlights will next be updated when there are significant changes in the fire activity or resource movement.

Dry Creek Fire Update

The Bureau of Land Management Alaska Fire Service reported a 75 percent active smoldering perimeter on the Dry Creek Fire with no signs of fire or smoke. A surveillance flight was conducted yesterday and the size of the fire remains at 26,639 acres.

The fire is south of the Tanana River and is geographically located in a Limited management option area. The BLM-

Alaska Fire Service continues to monitor the situation. Surveillance flights occur daily over the area and DOF engines and other personnel are continuing to patrol the area.

Smoke has been reported from Fairbanks, North Pole and surrounding areas as fire activity continues, and is likely to be an issue until rainy weather conditions arrive. There was local precipitation on Monday but not enough to impact the fire. Possible showers are forecasted for the end of the week.

The Dry Creek Fire was caused by lightning on June 23 and is located 18 miles south of North Pole, 13 miles south of Eielson AFB and 25 miles south of Fairbanks. The fire is on land co-managed by BLM and the U.S. Army Alaska.

For more information about the Dry Creek Fire, contact the Fire Information Office at the Alaska Fire Service at 907-356-5511.

New Fire Activity

Fire season continues to hang on with a new fire 14 miles southwest of Beaver on the north bank of the Yukon River. A commercial aircraft crew reported the fire at 5:30 p.m. yesterday. The Hodzana Slough Fire was near a full management option area and there was a possible threat to structures. Eight Smokejumpers were sent to the fire; determined to be 1-acre. Structure protection action was taken.

Lower-48 Support

Agencies in Alaska continue to provide support to both the Lower-48. The amount of resources out-of-state fluctuates and includes fire crews, individual personnel, and aircraft (helicopters and air tankers). The firefighting agencies continue to maintain appropriate staffing levels needed for the current Alaska fire situation.

Crew Specifics: The Agency and Emergency Firefighter crew rotation lists are available at

Information Gathering

Alaska

The Alaska Interagency Coordination Center (AICC) is the Geographic Area Coordination Center (GACC) for Alaska. It serves as the focal point for initial attack resource coordination, logistics support, and predictive services for all State and Federal agencies involved in wildland fire management and suppression in Alaska. The center operates on an interagency basis - cooperators include the Bureau of Land Management, State of Alaska Department of Natural Resources, USDA Forest Service, National Park Service, Bureau of Indian Affairs, and the Fish and Wildlife Service.

National

The U.S. is grouped into 11 Geographic Area Coordination Centers (GACC): Alaska, Eastern Area, Eastern Great Basin, Northwest, Northern Rockies, Northern California, Rocky Mountain, Southern Area, Southern California, Southwest and Western Great Basin. The map pictured at left shows the states that these geographic areas encompass.

Fire information by GACC: <http://www.nifc.gov/nicc/information/information.htm>.

The National Interagency Coordination Center (NICC) is located in Boise, Idaho. It is the focal point for coordinating the mobilization of resources for wildland fire and other incidents throughout the U.S. Like the GACCs, NICC also provides Intelligence and Predictive Services related-products.

In addition to the wildland fire information provided on each GACC website, useful sources may include:
